The latest Gobbetto lines represent an evolution in the field of innovative flooring surfaces, with the Dega Art line able to incorporate metal, ground stone, etc, for a textured surface

GOBBETTO

Skilled in the art of resin technology and application since the 1960s, Gobbetto offers a wide range of products to enhance surfaces and backgrounds. Its latest product lines, Dega® Art and Dega® Spatolato, represent an evolution in the field of innovative surfaces suitable for outdoor and indoor floorings. A range of textures, colours and finishes is available.

THOMAS MERCER

Inspired by the form of a winch, the limited edition Thomas Mercer Classis by Andrew Winch Designs is the result of a collaboration between two of the great names in chronometry and yacht design respectively. The fine ebony Macassar body, produced by the internationally renowned furniture manufacturer, Linley, also represents British craftsmanship at its best. One of the hidden treasures is the winding key, which is presented in a hidden drawer and inset into a panel at the base. The façade of the timepiece brings together those celebrated ships that embarked on the most significant voyages of discovery. The unique beauty of the Classis exterior is reflected in the inner workings of the mechanism, which retains the traditional elements of a pure chronometer by Thomas Mercer.

PUIFORCAT

A timeless classic, the unique Checkmate chess set was designed in 1927 by Jean Puiforcat. Crafted in sterling silver, ivory and Macassar ebony, it symbolises the graphic simplicity of Art Deco and the exquisite craftsmanship of the Puiforcat company. Each of the 32 pieces is ivory or ebony set in sterling silver, and has been painstakingly crafted using the cliqueté technique. New product lines include the Champagne collection with its exclusive golden gilt finish, and a clock featuring a 1932 design.
